

Research position available
Human visual perception and fMRI
RIKEN Brain Science Institute
Gardner Research Unit
Wako, JAPAN

We are currently hiring a post-doctoral position (short term 6-12 month internships are also possible) in the Gardner Research Unit at the RIKEN Brain Science Institute. We are looking for highly motivated scientists who are interested in studying visual perception with a combination of functional MRI techniques and psychophysics. Candidates should have, or be expecting to receive, a PhD in neuroscience, bioengineering, or related fields. A strong training in experimental methodology (not necessarily fMRI and psychophysics – for example, single-unit neurophysiology is appropriate) with solid quantitative skills is required. Seminars and daily scientific activities at the RIKEN Brain Science Institute are all conducted in English. Non-Japanese applicants may apply for on-campus housing for their first year. RIKEN is located in Wako, Japan which is a 12 minute train ride from central Tokyo. For inquiries, send a brief cover letter stating your research interests, your CV and contact information for two scientist who can act as references to Justin L. Gardner at gru@brain.riken.jp.
